

It's Only Natural

Black surface, Hot sun
Bare feet you better run
some things you just don't over think

cool night, bench seat
why waste this body heat
slide over baby right next to me

It's only natural why try to figure it out
designed to drive you crazy
every time it comes around
like breathing, like thunder it's this world's greatest wonder
it's falling on you and me right now
it's only natural

you can't calculate
who's gonna win a football game
you just can't measure heart
we can't control a thing
it rains when it's gonna rain
so when love finds you soak it up
